ANALYSIS OF PAST TECHNOLOGY

**UCEAP Transcript Title**

ARCHAEOLOGY OF TECH

**UCEAP Quarter Units**

8.00

## **UCEAP Semester Units**

5.30

### **Course Description**

The course provides a general understanding of metal and ceramic technology and relates the manufacture and use of artefacts to their relevant social contexts in the Bronze Age, the Iron Age, and the Medieval Period in the Nordic region. Combined with insights from ethnography and ethnoarchaeology in various parts of the world, students discuss how items of bronze, iron, and clay were manufactured and used, and examine the artefacts' find context on sites from the Bronze Age, the Iron Age, and the Medieval Period. The course has a prominent practical component where the theory from the lectures is put into practice.
