Course Description
This course gives insight and practice in the role of the engineer as designer, and fosters an appreciation of the purpose behind the theoretical teaching they receive. It shows students the ways in which engineers work and how they handle the design process. Students gain the confidence to be creative designers by hands-on experience of the processes in relation to a practical project. Students also explore essential engineering skills, work in groups, and use problem-based learning to find solutions to engineering projects.
