Course Description

This course gives students a thorough introduction to the field of behavioral organizational economics. The course discusses seminal as well as current research papers in the field, featuring empirical studies as well as lab and field experiments. The goal of the course is to transfer research findings to real-world applications in organizations. Students study employment relationships between workers and organizations and get to know key factors that shape them in a positive way. Students focus on the two concepts of motivation and selection, and they learn about how to detect discrimination in the hiring process.
