Course Description

This course introduces contemporary geography, involving processes and problems, socio-economic and environmental issues/processes shaping our world, and the geographical perspectives needed to understand them better. Starting with how geographers view the world, the course offers a spatial lens to analyze such issues as climate change, urban flooding, human-environment relations, challenges of migration, economic production and consumption, and so forth. Each lecture discuss contemporary scenarios that students are familiar with alongside geographical analyses of and approaches to the issues. Students are also exposed to field work techniques, mapping skills and strategies of project management in small group discussions and project assignments.
