

## COURSE DETAIL

### THERMODYNAMICS APPLIED TO INDUSTRIAL PROCESSES

**Country**

Mexico

**Host Institution**

National Autonomous University of Mexico

**Program(s)**

National Autonomous University of Mexico

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Chemical Engineering

**UCEAP Course Number**

144

**UCEAP Course Suffix****UCEAP Official Title**

THERMODYNAMICS APPLIED TO INDUSTRIAL PROCESSES

**UCEAP Transcript Title**

THERMO/INDSTRL PROC

**UCEAP Quarter Units**

4.50

**UCEAP Semester Units**

3.00

## Course Description

This course explores the applications of thermodynamics to analyze industrial processes. It focuses on thermodynamic models in the simulation and optimization of processes and selection of operating conditions to improve the performance of those processes. Course topics and discussion rely heavily on case studies.

## Language(s) of Instruction

Spanish

## Host Institution Course Number

0278

## Host Institution Course Title

THERMODYNAMICS APPLIED TO INDUSTRIAL PROCESSES

## Host Institution Campus

CIUDAD UNIVERSITARIA

## Host Institution Faculty

FACULTAD DE QUIMICA

## Host Institution Degree

## Host Institution Department

INGENIERIA QUIMICA
