Course Description

This course gives an overview of the contributions from applied cognitive, social, forensic psychology, and criminal psychology to the understanding of witness and criminal behavior. It examines the evidence from child witnesses and impact of crime on victims of sexual offences and provides an understanding of the implications of forensic psychology in the justice system. Students are expected to demonstrate awareness of current theories and research related to witness and criminal behavior. Students discuss issues related to the current state of knowledge on criminal behavior current incidents, research, and media influences.
