UCEAP Quarter Units
1.50

UCEAP Semester Units
1.00

Course Description

Focusing on the function words of the former Japanese Language Proficiency Test (JLPT) level 1, this course explains the functional expressions that advanced learners should acquire. The title of the course is "Introduction to Grammar," but explaining Japanese grammar to Japanese learners is not conducive for practical use. "Sentence pattern" likely refers to one pattern, so that one can remember the whole sentence pattern. In the weekly course, it is not possible to practice using the expressions that have been learned, so this course points out the mistakes that learners tend to make when using the expressions and teaches them how to use similar expressions. In the spring semester, functional words will be introduced and explained according to pattern.
