Upper Division

UCEAP Subject Area(s)
Statistics

UCEAP Course Number
102

UCEAP Course Suffix

UCEAP Official Title
UNDERSTANDING SOCIAL MEDIA

UCEAP Transcript Title
SOCIAL MEDIA

UCEAP Quarter Units
8.00

UCEAP Semester Units
5.30

Course Description

This course provides an introduction to the theory and practice of using social media data for research and enables the development of transferable research and data skills. Such skills are in demand in the research and consultancy profession across the public and private sectors. After reviewing the different data types including Facebook and Twitter, students consider how to access and analyze such data. This, in part, includes developing the student's critical data skills, hands-on training, and practice analyses on real social media data such as coding Tweets and blogs. This involves the use of on-line software to gather social media data. The course involves the development of research design skills including hypothesis testing, data analysis, and interpretation and writing skills. The emphasis on the use of real data to answer questions is designed to engage students and for them to consider using such approaches as part of their own dissertation research.
