Course Description

This course covers three main areas of major content. The first is the development history of economic development issues; the second is the analysis of factors of economic development, including economic growth theory, economic development and capital accumulation, economic development and human capital, economic development and resources and environment, etc.; the third is the structural changes of economic development, mainly including dual structure and its evolution, industrial structure evolution, etc.

It expands the knowledge of students of related majors and provides them with basic theories, research methods and analytical tools related to economic development for their future research on issues involving economic development or for their work related to economic and social development.
