UCEAP Course Number 109
UCEAP Course Suffix
UCEAP Official Title INTRODUCTORY ENVIRONMENTAL ECONOMICS
UCEAP Transcript Title ENVIRONMENTAL ECON
UCEAP Quarter Units 8.00
UCEAP Semester Units 5.30

Course Description

This course introduces students to the field of environmental economics. They discuss and analyze how markets, without policy intervention, fail to capture environmental externalities. They then discuss the possible regulatory measures and policy instruments available to correct such market failures yielding what might be the socially optimal level of pollution. The course introduces various environmental valuation techniques that help identifying the costs and benefits of controlling environmental externalities.

Language(s) of Instruction
English
