UCEAP Course Suffix
UCEAP Official Title QUEER FEMINIST ISSUES IN METHODOLOGIES
UCEAP Transcript Title QUEER FEM METHODS
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

What are the methodological implications of queer theory? What makes an article or a research project 'queer' or 'feminist'? This course provides students with a practical exploration of queer theory and feminist perspectives in research methods. We examine how societal norms and power structures impact research, including research design, data collection methods (such as surveys, interviews, and observations), data analysis techniques, and ethical considerations in research. We explore a range of concepts, such as intersectionality, homonormativity, and anti- and inter-disciplinarity, and discuss how they could shape and inform sociology and research. After covering these key concepts, we focus on ethnographic methods and address the ethics of conducting research with vulnerable groups, including the importance of consent, confidentiality, and reflexivity. Throughout the course, students develop critical thinking skills, engage in discussions and debates, and conduct research tasks under the supervision of the instructor. The course hosts guest speakers who are experienced in gender and sexuality research in Germany.

Language(s) of Instruction
English
