## Course Description

This course aims to familiarize students with digital video production and editing in a broad context of education. It is designed to help students learn the technology, art, pedagogy, and practices involved in effective visual storytelling. With the advancement of digital technologies, making a video program has become much easier than before. Even so, to produce a highly effective and professional video, we need to learn certain production strategies, skills, and theories. This course offers exciting opportunities to learn basic theories and technical skills through the production of high-quality short video programs, using simple devices such as a smartphone. It helps students produce video content that has high educational value in a rapidly changing media environment.
