GLOBL SUSTAINABILTY

UCEAP Quarter Units
6.00

UCEAP Semester Units
4.00

Course Description

With a growing number of unsustainable environmental, economic, and social trends, how can different actors work for sustainable alternatives? How can we develop capacities, strategies and tactics that achieve lasting and real changes in the local and global world? To achieve a more vibrant and participatory sustainable development there is a need for great changes, both on the systemic and individual level. These changes can take the form of fast-moving revolutions, but can also be more reformist initiatives as social entrepreneurship in businesses or taking part in local politics. In the course different actors and their strategies for change, globally and locally, are critiqued and analyzed through discussions with guest lecturers and in workshops with fellow students. In the last part of the course students work on a concrete change project, which builds on the discussions and insights gained during the first part of the course.
