3.30

Course Description

This course takes both a short and a long-term view of the economy and helps students to understand how modern macroeconomics have attempted to explain economic growth as well as fluctuations. The course also looks at the design and effectiveness of macro policies to boost growth and stabilize fluctuations. Topics include measurement of the macroeconomy; long-run macroeconomic model and determinants of long-run growth; short-run macroeconomic model and its building blocks; and monetary and fiscal policies and their effectiveness.
