ART& ENVRONMENT: US

UCEAP Quarter Units
4.50

UCEAP Semester Units
3.00

Course Description

This course explores the relationship between the natural world and United States culture, considering specifically the visual expression of that relationship: How have Americans imagined “nature” and represented it? How have concepts of land and landscape shaped perceptions about social order, identity, and sustainability? The course provides both a historical framework for thinking about these questions as well as a contemporary perspective, particularly in the context of a potential new era known as the “Anthropocene.”
