UCEAP Course Number 128
UCEAP Course Suffix
UCEAP Official Title INTERNATIONAL FINANCE
UCEAP Transcript Title INTERNATL FINANCE
UCEAP Quarter Units 4.00
UCEAP Semester Units 2.70

Course Description

This course is about international financial economics (also known as international monetary economics): the movement of currencies and other financial assets across national boundaries. In this course, students will develop a set of analytic tools that can be used to analyze world economic policy debates. In particular, this course will examine the determination of exchange rates and how they are influenced by various economic phenomena such as interest rates, money supply, output, and unemployment. We will investigate different models of exchange rate determination and discuss how actual data supports or refutes these models.

Class meetings are interactive, usually beginning with a brief, student-led review of current events related to international finance. We then work through together, as a class, one of the models under study or look at some economic data and how it informs our understanding of the models under study.
