Course Description

This course has been designed to provide students with an introduction to a range of important concepts, theories and principles that underpin the study of economics. Lectures take the form of lectures, case studies, and problem-solving exercises. The aims of the course are to: Provide students with an introduction to a number of essential economic concepts, principles and models, explain the functioning of markets, demand, supply, and government economic policies, and provide students with some analytical tools to tackle economic problems.
