

## COURSE DETAIL

### FISHERS AND FISHERIES ANTHROPOLOGY, ACQUATIC RESOURCES AND DEVELOPMENT

**Country**

United Kingdom - England

**Host Institution**

University College London

**Program(s)**

University College London

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Anthropology

**UCEAP Course Number**

153

**UCEAP Course Suffix****UCEAP Official Title**

FISHERS AND FISHERIES ANTHROPOLOGY, ACQUATIC RESOURCES AND DEVELOPMENT

**UCEAP Transcript Title**

FISHERIES ANTHRO

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

**Course Description**

This course touches on themes in political ecology, environmental anthropology, the anthropology of food, and the anthropology of development through a detailed exploration of the world's fisheries; from the fisherfolk that harvest them to the people around the globe that consume them. It critically examines the global fish "crisis" and prospects for global food security and supply; conservation v's development discourse in resource management; scientific & traditional management of natural resources; certification/eco-labelling and the "green" consumer; commodity chains; ecology of small scale fishers groups; and poverty, development, and livelihoods. Each student on the course becomes a member of CARP-London (Cities Aquatic Resource Project - London) an initiative which both trains undergraduates in research and builds our understanding of the production, supply, and consumption of aquatic resources in our urban centers.

**Language(s) of Instruction**

English

**Host Institution Course Number**

ANTH0065

**Host Institution Course Title**
