UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course is part of the Laurea Magistrale program. The course is intended for advanced level students only. Enrollment is by consent of the instructor. The course provides an understanding of key issues involved in environmental politics, from both a theoretical and practical perspective. Environmental issues are critically discussed, with particular reference to the role and responsibilities of great powers in the international politics of climate change, power inequality, and the global ecological crisis. Students acquire and learn: 1) the essential conceptual, theoretical, and methodological tools necessary to tackle and understand environmental issues; 2) knowledge regarding the major interpretations of environmental security; 3) basic knowledge about major environmental powers (United States, China, European Union, India, Brazil, Russia) and international institutions and issue areas (UN Security Council, multilateral environmental agreements, international climate leadership, coal politics); and 4) how to apply the acquired tools to the analysis of concrete cases.

Language(s) of Instruction
English
