**Course Description**

This course provides a general and base knowledge of modern industrial organization based on strategic interaction among firms and consumers. The course examines the functioning of the markets by analyzing the behavior of non-competitive firms, also with the tools of modern game theory. Industrial policies and regulation are discussed together with the principles of competition policy. The course discusses topics including introduction and microeconomics background; game theory and oligopoly; market structure; non-price strategies; and competition policy and regulation.
