UCEAP Course Suffix
UCEAP Official Title POST-PANDEMIC CITIES AND CLIMATE CHANGE
UCEAP Transcript Title CITIES &CLIMATE CH
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course considers how the global pandemic of 2020-2021 has challenged the modus operandi, urban development model, and financial viability of the world's great cities at a time when those also have to face the profound challenge of making themselves more resilient against the multi-faceted threat of climate change. It highlights both the danger and opportunity brought on by the pandemic, in terms of rethinking transport systems, commercial real estate, commuting and work arrangements, food distribution, energy, waste management and recycling, housing policy, education, and the provision of essential business as well as personal services. The course examines the shake up of “established wisdom” in urban economics which has led to new thinking and an opening for innovation that extends to new organizational formations within the context of the “circular economy,” as well as “social solidarity economy” such as urban commons and cooperatives.
