ETHICS/ARTIF INTELL

# **UCEAP Quarter Units**

6.00

### **UCEAP Semester Units**

4.00

## **Course Description**

This course explores the ethics of artificial intelligence in the context of autonomous technologies that involve the transfer of control and governance from human beings to robots and other intelligence systems. Normative and behavioral theories of ethics are used to explore the implications of artificial intelligence in the areas of liability associated with ownership of AI, agency and privacy, biases, malicious and harmful use of AI, and the rights of artificially intelligent beings.
