UCEAP Transcript Title MACROECONOMICS
UCEAP Quarter Units 4.50
UCEAP Semester Units

3.00

Course Description

This course places special emphasis on recent macroeconomic history and data, as well as how to retrieve and analyze macro data from publicly available sources, using the R statistical software. It covers core aspects of macroeconomics such as GDP, consumption, investment, the trade balance, and inflation through the lens of macroeconomic evidence, and discusses different macroeconomic theories (neoclassical and Keynesian) in light of this evidence. The course also discusses policy-relevant topics such as fiscal and monetary policy, public debt, and budget and trade deficits. An introductory economics course is a prerequisite.
