6.00

**UCEAP Semester Units**

4.00

### **Course Description**

This course is part of the Laurea Magistrale program. The course is intended for advanced level students only. Enrollment is by consent of the instructor. This course examines the origin and the evolution of these differences in health over the life cycle. The course studies how to measure these differences from conception to old age; and how these differences have been connected to the individual, family, neighborhood, national, and global phenomenon's. The course analyzes different policies and interventions that have tried to alleviate these differences; and sees how these differences contribute to the rising inequality in the last century. The course discusses topics including: measurement of inequality (statistics); mortality, fertility, and birth outcomes; (demographics); health behaviors (economics); mental health (psych); the early origin hypothesis (epidemiology); and social genomics (behavioral genetics).
