

COURSE DETAIL

THE WAR ON CANCER: FROM BIOLOGICAL MECHANISMS TO DRUG DEVELOPMENT

Country

United Kingdom - England

Host Institution

University of Cambridge, Pembroke College

Program(s)

Summer in Cambridge

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Biological Sciences

UCEAP Course Number

118

UCEAP Course Suffix

S

UCEAP Official Title

THE WAR ON CANCER: FROM BIOLOGICAL MECHANISMS TO DRUG DEVELOPMENT

UCEAP Transcript Title

WAR ON CANCER

UCEAP Quarter Units

5.00

UCEAP Semester Units

3.30

Course Description

"Cancer" is among the most encountered terms in our daily lives, but few beyond the biomedical profession truly understand what cancer is. This course helps students understand this complex disease. The course starts from the era of the ancient Greeks, through the world wars and their role in advancing cancer treatment, to the most cutting-edge research ongoing today and what the future holds. Students also learn about important techniques involved in modern day research, including gene editing, cancer modelling, and computational biology. They also discuss key scientific publications in the field of cancer biology.
