## Course Description

The globalization of the translation industry has accelerated the use of specialized tools in response to constraints such as time, cost, consistency and teamwork. This class offers students an opportunity for hands-on exploration of a number of industry-leading applications widely used today by key players in the translation industry to equip students with knowledge about translation working environment; translation memory technology; translation project management; translation workflow management; translation quality management; machine translation, and so forth. By using them to complete both individual and collaborative translation tasks, you will gain an understanding of: (1) An overview of the localization industry in which the tools are used; (2) Their potential and limitations; (3) Methods of evaluating their performance, and (4) How translation quality are evaluated in the translation industry.

## Language(s) of Instruction

English
