### **Course Description**

In this course, students look closely at one point in the very distant past and at the early origins of Western civilization, at Homer and the Greeks, at ancient Greek language and culture, at its strange and yet (as we shall see!) familiar words, its structure and its thought. Homer and the ancient Greeks are part of our world, our language, our thought, and our lives. If you are studying chemistry or English, history, economics, or maths, and want to know why the past, Greek, and the Greek culture matter, this Trinity Elective is the course for you.
