# **COURSE DETAIL**

## MICROBES, HUMANKIND, AND THE ENVIORNMENT

## **Country**

United Kingdom - England

#### **Host Institution**

University of Manchester

## Program(s)

University of Manchester

### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

**Biological Sciences** 

### **UCEAP Course Number**

108

### **UCEAP Course Suffix**

Ν

#### **UCEAP Official Title**

MICROBES, HUMANKIND, AND THE ENVIORNMENT

## **UCEAP Transcript Title**

MICROBES&ENVIRONMNT

### **UCEAP Quarter Units**

4.00

### **UCEAP Semester Units**

### **Course Description**

Microbes, extremely diverse both in form and in function, play a critical role in the global ecosystem. Students explore how these organisms evolved from more primitive lifeforms to colonize new environmental niches. Students study their interactions with plants, animals, and insects and how they impact on our everyday lives.

# Language(s) of Instruction

English

### **Host Institution Course Number**

BIOL10532

### **Host Institution Course Title**

MICROBES, HUMANKIND, AND THE ENVIORNMENT

## **Host Institution Campus**

University of Manchester

# **Host Institution Faculty**

**Host Institution Degree** 

## **Host Institution Department**

**Biological Sciences**
