# **COURSE DETAIL**

## **ECOSYSTEM SCIENCE**

## **Country**

United Kingdom - England

#### **Host Institution**

University of London, Queen Mary

## Program(s)

University of London, Queen Mary

### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

Geography

#### **UCEAP Course Number**

158

#### **UCEAP Course Suffix**

#### **UCEAP Official Title**

**ECOSYSTEM SCIENCE** 

## **UCEAP Transcript Title**

**ECOSYSTEM SCIENCE** 

## **UCEAP Quarter Units**

6.00

### **UCEAP Semester Units**

4.00

### **Course Description**

This course explores the fundamental environmental units: ecosystems. Students use biological and physical science perspectives to examine the geographical distribution of ecosystems and to understand the principles and processes governing their structure and function. Students study the exchange of materials and energy between biotic and abiotic ecosystem components, focusing on water and carbon cycles. Students apply biogeoscience perspectives when interpreting how ecosystems change in response to internal system processes, environmental change, natural disturbance events and human activities.

### Language(s) of Instruction

English

### **Host Institution Course Number**

GEG5224
