Course Description

This course is part of the Laurea Magistrale program. The course is intended for advanced level students only. Enrollment is by consent of the instructor. This course examines: the conceptual and theoretical foundations of cybercrime research; the cutting edge empirical research on cybercrimes; the main tools and practices related to the prevention and countering of cybercrimes, and to their harm mitigation; the social challenges and implications of digitalization and datafication in the context of cybercrime research and investigations; and develops an approach to cybercrimes that recognizes the cross-disciplinary nature of the area. The course discusses topics including approaching and researching crime in cyberspace; crimes against devices; crime against persons; crimes of deception and coercion; intellectual property infringement; market-based crimes; political offences; cyberterrorism and radicalization; information pollution; disrupting and preventing cybercrimes; crimes of the present, crimes of the future; and researching crime in cyberspace.
