ENGINEERING THINKING I

UCEAP Transcript Title

ENGINEER THINKING 1

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This course explores and identifies why engineering is essential to the modern world. Students learn how engineers draw on scientific knowledge, research techniques, technical know-how, skills and collective experiences as well as societal facts and values to solve problems of any size or complexity. Within the interplay of these factors, many life-changing decisions and engineering solutions cannot be made using only calculations but require sound thinking and justifications based on often incomplete information.
