3.00

**UCEAP Semester Units**

2.00

## Course Description

This course is primarily for horticulture students and students from relevant fields. It studies fundamental principles of plant propagation, including the biological basis of propagation, seed propagation, vegetative propagation, and tissue culture propagation. The course also provides an introduction to techniques and selected case studies. Lab section is required; the lab work is designed to reinforce the lecture material by providing an opportunity to observe horticultural applications and their parts firsthand as well as to do experiments.

## Language(s) of Instruction

English

## Host Institution Course Number

HORT3002

## Host Institution Course Title

PLANT PROPAGATION

## Host Institution Campus

## Host Institution Faculty

College of Bio-Resources and Agriculture
