UCEAP Semester Units

3.30

Course Description

This course examines core issues facing entrepreneurs and tech startups in Hong Kong and elsewhere and the legal, regulatory and/or policy issues and consideration arising from these. It covers the pervasive role of law (domestic and cross-jurisdictional) in the context of ABCD of technology (namely AI, blockchain, cloud and data) and business models (such as digital assets and circular economies), as well as the importance of self-governance standards and ethics, especially where there is an absence of laws and regulations.
