## Course Description

Understand the basic laws of the interaction process between "learning" and "teaching"; master the psychology of students and teachers, master the general laws of students' physical and mental development, and the general laws of teachers' growth; be able to memorize and understand the principles of learning The nature, process and basic conditions of general learning, and master the general rules of individual learning. Master the basic principles of instructional design.

To enable learners to better understand the psychology of students and teachers, love teaching, care about the overall development of students, and invest more emotions in teaching.

To be able to consciously apply the educational psychology theory and knowledge learned in the practice of international Chinese education. Specifically: to be able to use the knowledge of educational psychology to explain actual teaching activities and designed educational teaching activities.

Educational psychology is a science that studies the basic laws of the interaction between learning and teaching through scientific methods. The content of educational psychology courses is organized around the process of interaction between learning and teaching, including learning psychology, teaching psychology, student psychology and teacher psychology. Four major parts. After taking this course, students should be able to understand and master the relevant theories of educational psychology, and should be able to consciously apply what they have learned to international Chinese education or other related teaching practices.
