ECOLOGY AND CONSERVATION

**UCEAP Transcript Title**

ECOL & CONSERVATION

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines the ecological principles driving the major ecosystems of the world and ecological processes behind the world's major conservation issues. Students gain an understanding of ecology and its application in conservation and the ecology of the major terrestrial and marine biomes of the world. The course integrates the application of ecological theory and methods to practical conservation problems. Students get hands-on experience in ecological sampling and data handling to understand the ecology of marine and terrestrial environments, as well as ecological simulations to understand processes.
