## Course Description

This course examines educational problems from the perspectives of classic and contemporary figures in sociology and philosophy. These two disciplines play complementary roles in clarifying both the conceptual foundations and the empirical assumptions that serve as the foundation of much debate over the means and ends of education. Students will engage deeply with major texts in these two fields and apply them to problems currently facing educators in Hong Kong and the rest of the world. The course uses a range of teaching and learning activities, and assessment tasks. They include analysis of selected issues, student presentation, and/or discussion in class and e-forum.
