UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This is an introductory course in macroeconomics. Topics include wealth and money; how a nation's income is measured; growth of wealth and how some countries have successfully achieved prosperity, while other countries have failed in achieving economic growth; and theories related to the business cycle, including the main topic of macroeconomics since John Maynard Keynes. This course also discusses the problem of lack of jobs available in this economy and explores the various economic theories from opposing schools.
