UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course examines musical genres worldwide within their respective social and cultural contexts. It explores some of the most important ideas that have informed the thinking of researchers working in this field - such as the connections between music and gender, social structures, forms of capital, politics, identity, health and the environment. The course also interrogates notions of the nature and experience of music, why musical genres differ and why music has such important but diverse significance worldwide.
