UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course examines the history of technology since the late 18th century. It covers both the major tenets of the development of technology during the past two centuries and major debates among historians of technology. It also covers major technologies that have influenced and changed modern society, such as the steam engine, railways or the computer, and also explores how new technologies and modern society influenced each other. The scope of the course is global, but it will particularly focus on developments in Europe, North America and East Asia.
