6.00

UCEAP Semester Units
4.00

Course Description
This course surveys current theories in cognitive psychology pertaining to perception, attention, memory, knowledge, language, and decision-making. Students examine the methods that cognitive psychologists use, including behavioral experiments and neuroscientific approaches. Students learn to support or refute theoretical perspectives; and to communicate the aims, methods, results, and implications of cognitive psychology experiments, using conventional standards of scientific writing.

Language(s) of Instruction
English
