UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course addresses theoretical concepts of environmental issues and provides an introduction to key concepts and solutions in environmental policy and politics at local, national, and global levels. Topics include how to cope with environmental problems; impacts of globalization on the environment; the main actors in planning and implementing environmental policies; what approaches seem most likely to solve environmental issues such as air pollution, natural resource depletion, and climate change; using political institutions, regulations, market mechanisms, or voluntary schemes to form environmental policies; and the roles of environmental movements, firms, and bureaucrats in environmental politics and policies.
