CHINESE TECH DEVT

UCEAP Quarter Units
3.00

UCEAP Semester Units
2.00

Course Description

This course familiarizes students with factual knowledge of technological developments in China from the Mao era onwards, as well as various scholarly insights into such developments. By the end of the course, students will be able to critically analyze China's technological developments and policies based on their increased understanding of different political contexts under different Chinese Communist Party (CCP) leadership, and how the technological developments have impacted social norms, social institutions, and social classes in China.

The course has one hour of lecture and one hour of class discussion. Different forms of class discussion will be held, including paired discussion, small group discussions, large group discussion, and short debates.

Language(s) of Instruction
English
