Course Description

This course integrates professional topics with listening and speaking skills. The professional topics encompass various areas such as philosophy, literature, economics, politics, society, history, medicine, natural sciences, engineering, arts, and more. The training in listening, speaking, and viewing skills related to these professional topics includes note-taking, inference, and a series of listening micro-skills, as well as expressing opinions, explaining charts, and other presentation micro-skills. Through listening and speaking exercises in an academic context, students will enhance their academic Chinese language proficiency.

After taking this course, students will be

Mastering Academic Vocabulary and Sentence Structures in Fields Such as Humanities, Sciences, Engineering, and Medicine in Chinese.

Enhancing Comprehension Skills in Listening to Academic Lectures in Chinese.

Improving Proficiency in Expressing Academic Presentations and Engaging in Academic Discussions in Chinese.

Fostering the Desire of International Students to Integrate into Their Respective Disciplines and Engage in Academic Learning and Research.

Cultivating Overall Academic Learning and Research Competencies in International Students.
