Course Description

This course provides a global and international overview of the history of psychology and recent developments in the field, including a focus on open science and the reproducibility crisis. It instructs on major schools of thought and trends in psychology as well as recent developments in psychological science and research methodology, including open science and reproducibility in psychological research.

The course aims to:

1) Provide an understanding of the history of psychology and major schools of thought from a global and international perspective.

2) Identify and analyze key figures and their contributions to the field from diverse cultural and historical perspectives.

3) Understand the scientific method and its role in psychological research, and the importance of recognizing and addressing issues related to post-colonialism and ontological diversity in psychological research.

4) Analyze current trends and developments in psychology, including open science and the reproducibility crisis.
