Environmental Studies Biological Sciences

**UCEAP Course Number**

157

**UCEAP Course Suffix****UCEAP Official Title**

MARINE AND AQUATIC ECOLOGY

**UCEAP Transcript Title**

MARINE&AQUATIC ECOL

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines the ecology and conservation of shallow aquatic habitats, with a major emphasis on the ecology of marine coastal systems such as kelp forests, coral reefs or seagrass meadows but also including freshwater ecosystems. There is a very strong emphasis on experimental ecological analysis of benthic communities.

### Language(s) of Instruction

English

### Host Institution Course Number

BIOS2091

### Host Institution Course Title

MARINE AND AQUATIC ECOLOGY

### Host Institution Campus

New South Wales

### Host Institution Faculty
