Course Description

This course develops competencies in the planning and performance of experiments and the evaluation of results using common techniques in molecular genetics and cell biology. The skills training starts with an introductory lecture providing information on the assignments as well as an introduction to Good Laboratory Practice (GLP) and Safe Laboratory Practice (SLP). Students perform experiments on several different topics including Immunocytochemistry; Immunofluorescence and advanced imaging (confocal and STED microscopy); Western blotting; and Electron microscopy. This course is designed to be taken in combination with SCI2037 Cell Biology. Students who wish to take this course should concurrently enroll in SCI2037 Cell Biology prior to enrolling in SKI2077.
