N

**UCEAP Official Title**
FINANCIAL STATEMENT ANALYSIS

**UCEAP Transcript Title**
FINANCIAL STATEMENT

**UCEAP Quarter Units**
6.00

**UCEAP Semester Units**

4.00

**Course Description**

This course presents financial statement analysis from the point of view of the primary users of financial statements: company managers, creditors, and investors. The course provides students with tools to enable them to analyze financial statements and draw inferences about the performance and the value of a firm. The course is structured in two broad parts. Financial analysis forms the first part, focusing on past and present performance evaluation to generate expectations about future performance (prospective analysis), credit rating and distress prediction. The second part, security valuation, focuses on market- and accounting-based models to derive the value of a firm. All analyses are conducted within the context of a firm’s industry and strategy. This is an applied and practical course.

**Language(s) of Instruction**
English
