Course Description

Economic history is a branch of economics. This course focuses on the transformation of modern China, combines classical studies and cutting-edge literature, and examines Chinese history from the perspective of economics. The course consists of two parts. Firstly, it introduces the economic facts and systems of Chinese history, including per capita income level, productivity, technological progress, fiscal system, market, monetary and financial system, etc. Secondly, it discusses the response and economic performance of modern China under the impact of western countries.
