COURSE DETAIL

HUMAN BODY
Country Japan
Host Institution Keio University
Program(s) Keio University
UCEAP Course Level Lower Division
UCEAP Subject Area(s) Health Sciences
UCEAP Course Number 20
UCEAP Course Suffix
UCEAP Official Title HUMAN BODY
UCEAP Transcript Title HUMAN BODY
UCEAP Quarter Units 3.00
UCEAP Semester Units 2.00

Course Description

This course studies fundamental biology and problems of medicine, medical treatments, and environments.

Society is currently flooded with too much information about health, disease, exercise, nutrition, and how humans should behave to be healthy. This course is designed to develop one's knowledge of the human body and to help one gain a scientific view of what health really means. The program focuses on the different biomolecules, cells, and systems that work together to keep one alive and healthy. Instead of using medical jargon, the instructor will illustrate core concepts of physiology and biochemistry in "lay terms" throughout the course.

Language(s) of Instruction
English

Host Institution Course Number
N/A

Host Institution Course Title
LIFE SCIENCE - CURRENT STATUS AND PERSPECTIVES: UNDERSTANDING THE BODY
