3.00

UCEAP Semester Units

2.00

Course Description

This course and its sequel, Econometrics 2, introduce modern econometric techniques. This course mainly focuses on classical regression analysis while Econometrics 2 discusses statistical causal inference. The statistical software R will be used occasionally in the course.

Students who successfully complete the course will learn (i) the principles of regression analysis and (ii) how to implement regression analysis with R.

Language(s) of Instruction
English
